ABOUT ME

FullStack developer, *software engineering degree student*.

Among my most outstanding technical skills is the creation of software solutions, mainly through **JavaScript** and **Java**.

I am a person with initiative, and resolute, my way of working is based on planning and pursuing **goals**. I consider myself to be quite **analytical** and **adaptive**, and I also enjoy **working in a team**.

Currently, my goals are focused on looking for a job with ambitious projects and to find my first experience as a web developer.

SOFT SKILLS

- Critical thinking
- Resilience
- Communication
- Change management
